

MID CITY STEEL

AWNING TUBING

Mid City Steel is proud to offer a high quality line of Awning Tubing which is made in the USA and features a unique Dynamic Triple Coat Process. Our extremely clean Awning Products do not weather or oxidize. They feature Hot Dipped Galvanizing, not mere electroplating like other inferior products. Our process insures total penetration so you wont have to worry about rust bleeding through the bar. Our Awning Tubing will ensure durability in your projects and the aesthetic perfection your customers deserve.

Our materials are available for immediate delivery in various user friendly bundle sizes. Mid City Steel prides itself on being the most dependable source for the products you need to make every project a success. Our customer service is unmatched. Simply put, at Mid City Steel "We work for you!"

Galvanized Solid Rounds

(Hot Dipped)

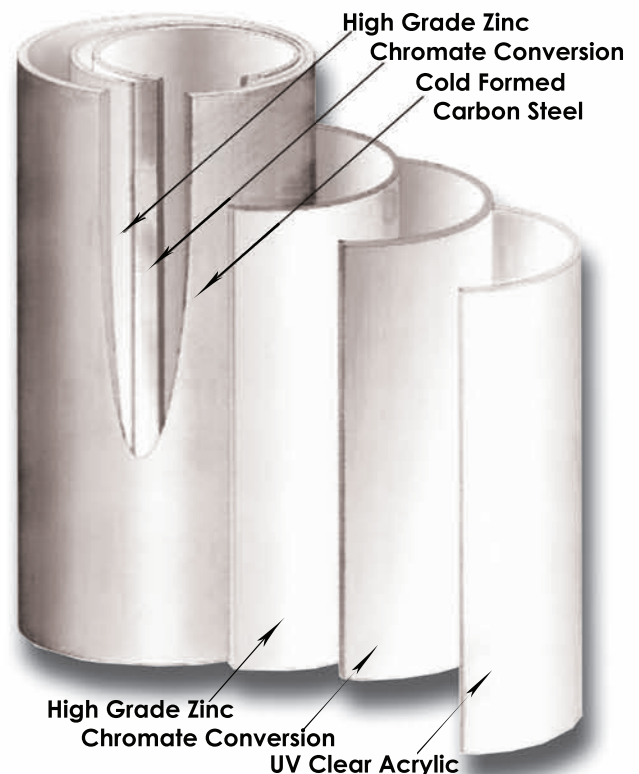

3/8" x 20'
 1/2" x 20'
 5/8" x 20'

DYNAMIC TRIPLE COAT PROCESS

Dynamic Genuine Galvanized Tube & Pipe products begin with prime base metal, which is then Hot-Dipped Galvanized with High Grade Zinc on both sides. This ensures inside and out protection for the life of your product. This is followed by a Chromate Conversion Process which protects and prepares the steel for the final coating. The exterior is then finished with a specialty formulated Clear Acrylic for Durability and Shine.
